

Filter Pipette Tip

Labselct Filter Pipette Tips are designed to fit a wide variety of single and multi-channel pipettes. They are compatible with most research grade pipettes. Technologically advanced filter material allows free passage of air while blocking aerosol contamination. They are ideal for molecular microbiology and microbiology applications where trace contamination can completely invalidate results. Racked packed filter tips are packaged in sealed-bottom racks with lids to prevent contamination and in sterilized form.

- Manufactured from virgin polypropylene for tip and high-quality hydrophobic polyethylene for filter
- Excellent compatibility
- Extended length is available
- Nonpyrogenic
- DNase-/RNase-free

- Filter is dense enough to prevent overflow
- Filter serves as a barrier against aerosols and protects the pipette shafts from any contamination
- Ideal for PCR, genetic research, sequencing, working with infectious samples
